

ENGE707 – Data Engineering and Ai

Contribution Statement for Phase 1

Group (iRobot)

Collaboration

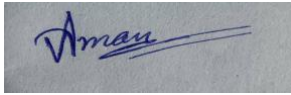

All team members contributed to the early stages of the project, including the definition of the problem statement and the selection of the dataset. Once the project direction was agreed, work was divided among team members by task, with weekly meetings held each week throughout the phase so members could update one another on progress, raise blockers, and review each other's work before the report was finalised.

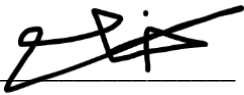

Task Allocation:

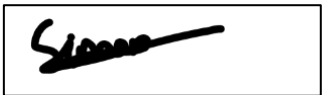

Task	Contributor(s)
Task 1: Problem Definition and Dataset Selection	Shared between all team members
Task 2: Data Acquisition, Inspection, and Documentation	Simon Aung
Task 3: Data Cleansing and Transformation	Khlaf Alshammari
Task 4: Exploratory Data Analysis and Visualisation	Aman Mohammed
Data Pipeline Diagram	Shared, discussed and initial concept developed as a group

Declaration

We confirm that the above accurately reflects each member's contribution to this phase of the project, and that all members were actively involved in regular team meetings.
